

## CYBERBULLYING

ABA<sup>1</sup> defines bullying as the repetitive, intentional hurting of one person or group by another person or group, where the relationship involves an imbalance of power. It can happen face to face or online.

Cyberbullying is bullying that happens online.

## PREVALENCE:

- 24% of children and young people will experience some form of cyberbullying
- 17% of children and young people will cyberbully others
- Name calling is the most common type of cyberbullying
- Girls were twice as likely as boys to report being cyberbullied
- Cyberbullying increased with age for both boys and girls; the reported prevalence rates of cyberbullying at age 15 were almost double those for 11 year olds
- Cyberbullying is associated with socio-economic status. Young people from more affluent families were more likely to report being victims of cyberbullying
